## PROFESSIONAL SUMMARY

Computer Engineering student and prolific software architect with **60 production web applications and simulation suites** deployed on GitHub Pages. Specialist in vanilla web engineering (ES6+, DOM, Canvas, Web Audio API), Progressive Web Apps (PWA), client-side memoization, and responsive UX design. Author of a published 276-page philosophical psychology work on Internet Archive. Disciplined academic performer (**8.24 CGPA** across 4 completed semesters) actively preparing for GATE CS/IT.

## TECHNICAL SKILLS

|                      |                                                                                                        |
|----------------------|--------------------------------------------------------------------------------------------------------|
| Languages & Core:    | JavaScript (ES6+), Python, C/C++, HTML5, CSS3, SQL                                                     |
| Frontend & Graphics: | React.js, Vite, HTML5 Canvas API, SVG Vector Paths, CSS Grid/Flexbox, Glassmorphism                    |
| Web Architecture:    | Progressive Web Apps (PWA), Service Worker Caching, Web Audio API, SPA Hash Routing, In-Memory Caching |
| Tools & Databases:   | Git/GitHub, GitHub Pages, MongoDB, Google Cloud Platform (GCP), LocalStorage Engines                   |

## GROUPED SOFTWARE ENGINEERING SUITES (60 DEPLOYED APPLICATIONS)

- Symmetrical Game Systems & Forensic Simulations** ([Project L.I.Z.](#), [Fractured Self](#), [LinguaWar](#), [Pawnova](#)) Live on GitHub Pages
  - Architected symmetrical multi-perspective game loops driven by dual synchronized state machines (e.g. Detective vs. Killer) sharing a canonical mutable crime scene data model.
  - Engineered real-time dynamic SVG deduction corkboards computing Bezier tangent paths between evidence nodes to evaluate multi-clue hypothesis logic gates.
  - Built an interrogation biometric engine with live ECG heart-rate simulation, composure decay, and zero-asset procedural audio generation (tension drones, heartbeats) via the browser Web Audio API.
- World Linguistics & Writing Systems Suite** ([18 Platforms: GreekFlow, HebrewFlow, KhmerFlow, ArmenianFlow](#), [18 PWA Applications](#) etc.)
  - Developed 18 specialized linguistics platforms decoding ancient and modern scripts (abugidas, alphabets, logographs) across Greek, Hebrew, Khmer, Amharic, Cyrillic, Georgian, and Burmese.
  - Integrated dynamic SVG stroke order vector animations, International Phonetic Alphabet (IPA) audio guides, Devanagari/Ge'ez ligatures, spaced-repetition drills, and offline PWA service workers.
- Statecraft, Philosophy & Relational Knowledge Archives** ([LeaderAtlas](#), [Conjectura](#), [Ashtavakra](#), [Golden Baghdad](#)) Zero-Dependency SPAs
  - Built zero-dependency client-side single-page applications indexing 447+ world leaders across 199 nations, 343 historic milestones, and classical Sanskrit/Arabic philosophical traditions.
  - Engineered tiered asynchronous JSON data loaders with in-memory memoization (caching 1,000+ normalized entity files) paired with automated text cross-linking engines for dynamic knowledge graphs.
- Creative Studios, Systems Utilities & AI Platforms** ([ManhwaMaker Studio](#), [CoreZen](#), [TradeLab](#), [UnityScript](#)) Canvas & AI Workstations
  - Created a digital webtoon authoring workstation supporting multi-layer HTML5 Canvas rendering, dynamic panel geometry re-slicing, and vertical-scroll mobile export serialization.
  - Architected privacy-first utility platforms including an offline fitness OS (CoreZen), algorithmic trading lab (TradeLab), and Gemini-powered comparative literature parser (UnityScript).

## PUBLISHED AUTHORSHIP & PHILOSOPHICAL RESEARCH

- Author: "The Questions That Heal"** ([276-Page Published Novel & Psychological Dialogue](#)) Internet Archive Edition
- Authored a 276-page dialogue-driven work exploring cognitive psychology, identity reconstruction, emotional healing, and epistemological inquiry through Socratic mentorship.
  - Synthesized classical Indian philosophical traditions (Advaita Vedanta of Adi Shankaracharya, Vishishtadvaita of Ramanujacharya, and Dvaita of Madhvacharya) with modern cognitive-behavioral insights.

## EDUCATION & ACADEMIC FOUNDATION

**Bachelor of Computer Engineering (B.E.)** - MET's Institute of Engineering, BKC, Nashik (SPPU) 2024 - 2028 (Expected)  
Cumulative CGPA: **8.24 / 10.00** (Sem 1: 8.72 | Sem 2: 7.83 | Sem 3: 8.05 | Sem 4: 8.36 | Sem 5: Current) HSC: **73.50%** | SSC: **87.00%**  
**GATE CS/IT & Core Systems:** Data Structures & Algorithms, Operating Systems, DBMS, Theory of Computation, Computer Networks, Discrete Mathematics.
